Product Overview

Professional Dry Cleaning Solution

This full-automatic dry cleaning machine is a state-of-the-art industrial cleaning solution engineered for high efficiency and environmental responsibility. Featuring robust stainless steel construction and advanced solvent recovery systems, it minimizes operational costs while delivering consistent, high-quality results. With programmable cleaning cycles, precise temperature control, and integrated safety interlocks, this machine is designed to handle a wide range of fabrics and garments with ease.

Technical Specifications

Available Models

- GXZQ-8F
- GXZQ-12F
- LGXZQ-16F (CEMC 4300 Series)

Suitable For

Commercial laundry • Dry cleaning businesses • Various fabric types

Core Features

Full-automatic operation, Stainless steel drum, Solvent recovery system, Programmable cycles, Temperature control, Safety interlocks
