

# Full Body Safety Harness with Lanyard

This full body safety harness is equipped with a lanyard and double locking snap hooks. It is designed for fall arrest and work positioning with adjustable straps and multiple attachment points.

## ADDITIONAL IMAGES

## Product Overview

### Professional Fall Protection

This full-body safety harness is engineered for general fall arrest applications, distributing impact forces across the shoulders, chest, back, waist, thighs, and buttocks to minimize injury risk. Designed for industrial use, it features fully adjustable straps at every connection point to ensure a secure, customized fit for various body types. The system includes an integrated shock-absorbing lanyard, providing reliable protection for workers operating at heights.
