

Full HD Video Conference Terminal with Integrated Camera and Microphone

This video conference terminal has an all-in-one design with embedded camera and microphone, and provides rich hardware interfaces. It adopts H.265 video codec technology and a wide angle lens to provide full HD 1080p video, strong network adaptability, high reliability and stability.

Overview

Professional HD Video Conferencing Solution

The ET301 is an all-in-one video conferencing terminal featuring integrated HD camera and microphone technology for seamless business communication. Designed for simplified deployment, it supports dual-screen displays and wireless content sharing from mobile devices and laptops. Enhanced by AI-driven participant recognition and robust network adaptation, it ensures high-quality meetings even under challenging network conditions.
