

Full-Size Stainless Steel Chafer with Glass Lid

This stainless steel chafer features a full-size food pan capacity, a glass lid for easy viewing, and a capsuled bottom for even heat distribution. It includes a water pan, food pan, and fuel holders.

Overview

Professional Full-Size Catering Chafer

This full-size stainless steel chafer is designed for high-end buffet and catering environments, featuring a transparent glass lid for easy food monitoring without heat loss. The unit utilizes a capsuled bottom for superior heat distribution and energy efficiency, ensuring food stays at optimal serving temperatures. Its versatile design supports multiple heat sources including induction, electric, and solid alcohol, making it adaptable to any professional venue.

Design & Construction

Dimensions

580 mm

Length

440 mm

Width

330 mm

Height

Primary Material

Stainless Steel

Lid System

Advanced Lid Technology

- Transparent glass window for clear food viewing
- Removable design for easy cleaning and storage
- Long-life damping hinge for silent operation
- Variable opening angles for flexible service
- Integrated internal water recycle system

Heating Performance

Efficiency Benefits

- Reduced energy loss during induction heating
- Extended heat preservation
- Even heat distribution across the base

Base Construction

Capsuled Bottom for even heat transfer

Compatible Heat Sources

Induction Cooker, Electric Heater, Solid Alcohol

Components

Included Components

Water Pan • Food Pan • Fuel Holders • Glass Lid
