

# Full Suspension Aluminum Mountain Bike

This full suspension mountain bike has a lightweight aluminum frame with a front suspension fork and rear shock absorber. It is equipped with high-performance Maxxis tires for superior grip and a reliable drivetrain for smooth shifting.

## Product Overview

### High-Performance Full Suspension Bike

Engineered for rugged trail performance, this full suspension mountain bike features a lightweight 7005 aluminum alloy frame designed for durability and responsive handling. It is equipped with advanced front and rear shock absorption systems to ensure a smooth ride over challenging terrain. The high-traction tires and professional-grade drivetrain provide superior control and efficient power transfer for downhill riding and technical trails.

## Frame and Suspension

### Frame and Shock System

Component	Specification
Frame Material	Alloy 7005
Rear Shock	KS-562
Front Fork	Revelation RT

## Drivetrain

### Drivetrain System

- Front Derailleur: FD-M780
- Rear Derailleur: RD-T780
- Chainwheel: FC-M780
- Shifter: SL-M780
- Freewheel: CS-M770

## Wheels and Braking

### Wheel Specifications

- Rim: XM 317 Disc
- Front Hub: HB-M785
- Rear Hub: FH-M785
- Spokes: Stainless
- Tires: Ardent

### Braking Performance

Front Disc-Brake KM785, Rear Disc-Brake KM785

## Components

### Cockpit and Seating

- Handlebar: A2RBH
- Bar Stem: A2MBS
- Saddle: Vigo
- Seat Post: CR2.2P
