

Full Suspension Mountain Bicycle

This full suspension mountain bicycle has a sturdy frame with both a front suspension fork and a rear shock absorber. Its multi-speed drivetrain and reliable braking system provide versatile riding and safe stopping power.

Overview

Built for Adventure

This full suspension mountain bicycle is engineered for versatility and control on challenging off-road terrain. Featuring a robust frame combined with both front suspension forks and a rear shock absorber, it effectively absorbs impacts to ensure rider comfort. Equipped with a multi-speed drivetrain and a reliable braking system, this bike provides the performance and safety needed for recreational mountain cycling.
