

Full Suspension Mountain Bicycle

This full-suspension mountain bicycle is designed for enhanced shock absorption. It features knobby tires and multiple gears for varied terrain.

Overview

Built for Rugged Terrain

This full-suspension mountain bicycle is engineered for superior performance on challenging off-road trails. Featuring both front and rear suspension systems, it provides exceptional shock absorption and rider comfort on uneven surfaces. Equipped with rugged, knobby tires and a versatile multi-gear system, this bike is designed to handle varied terrain with ease and precision.
