

Full Suspension Mountain Bike

This full suspension mountain bike is designed for off-road riding. It features a durable frame, front and rear suspension for enhanced comfort and control, and disc brakes for reliable stopping power.

LEOPARD 3.0

Overview

Built for Rugged Terrain

This full suspension mountain bike is engineered for downhill performance and off-road reliability. Featuring a robust TIG-welded frame and a 21-speed gear system, it offers versatile handling across challenging trails. With reinforced disc brakes and shock-absorbing suspension, riders can enjoy enhanced control and comfort on uneven surfaces.
