

Full Suspension Mountain Bike

This full suspension mountain bike has a lightweight frame with a front suspension fork and rear shock absorber. It is equipped with multi-speed gearing, disc brakes, and durable tires for reliable handling and control.

Overview

High-Performance Trail Riding

This full suspension mountain bike is engineered for versatility and control on challenging off-road terrain. It features a lightweight frame paired with a robust front suspension fork and a responsive rear shock absorber to ensure a smooth ride. Equipped with reliable multi-speed gearing and powerful disc brakes, it offers the handling and safety required for both adventurous trail riding and recreational use.
