

Full Suspension Mountain Bike with Long Travel

This full-suspension mountain bike is designed for all-mountain riding, where climbs and descents are both challenging. It offers long travel for absorbing bumps and jumps, with a feature to lock out the suspension when needed.

Overview

Built for the Backcountry

The Genius LT is engineered for all-mountain riders who demand versatility. With a hydroformed 6061 alloy frame and adjustable suspension travel, it offers an efficient climb to the summit followed by confident, controlled descents on technical terrain. This bike is the ideal partner for backcountry exploration where reliable performance is non-negotiable.
