

Full Synthetic High-Performance Gasoline Engine Oil

This full synthetic engine oil is suitable for high-end imported and domestic vehicles, racing cars, and SUVs. It meets European, American, Japanese, and Korean standards, providing an extraordinary driving experience for new high-tech engines.

Product Overview

High-Performance Synthetic Engine Oil

This full synthetic engine oil is engineered for high-performance gasoline engines operating under extreme conditions. Utilizing advanced active magnetic technology, it forms a protective magnetic oil film that adheres to engine surfaces for superior wear resistance. Designed to meet leading international standards, this lubricant ensures optimal engine protection and enhanced driving performance.

Technical Specifications

Viscosity Grade	5W/40
Performance Standards	API SN, ACEA A5
