

Full Synthetic Racing Engine Oil

This full synthetic racing engine oil is applicable to imported and domestic high-end cars, racing cars, and SUV vehicles. It delivers an extraordinary driving experience for new high-tech engines featuring variable valve, variable compression ratio, in-cylinder direct injection, and turbocharging.

Product Overview

High-Performance Synthetic Racing Engine Oil

This full synthetic racing engine oil is engineered for high-performance vehicles requiring superior protection under extreme driving conditions. Utilizing active magnetic intelligent molecule technology, the oil forms a protective film that adsorbs onto engine surfaces to minimize wear. It meets world-leading quality standards, ensuring consistent performance and engine longevity across all driving environments.

Technical Specifications

Oil Type

Full Synthetic • Racing Grade

Viscosity Grade

0W/40

Performance Standards

API SN, ACEA A5

Packaging & Availability

Available Volumes

- 1 Liter
- 4 Liters
