

FV Series Conveyor Chain

Conveyor chains in the FV series are designed for industrial material handling. These chains provide reliable and efficient performance in diverse conveying applications.

Product Overview

FV Series Conveyor Chains

The FV Series conveyor chains are precision-engineered power transmission components designed for high-strength and reliable performance. These chains are suitable for a wide range of industrial applications, offering durability and high mechanical efficiency. Built to international quality standards, they provide long-term operational stability in demanding conveyor and dragging systems.

Manufacturing Excellence

Annual Production Capacity

20000000 meters

Annual Capacity

Certifications

ISO9001, ISO14001, ISO16969, AAA, API

Product Capabilities

Available Chain Types

- A and B Series Chains
- Roller Chains
- Driving Chains
- Conveyor Chains
- Dragging Chains
- Agricultural Chains
- Stainless Steel Chains
