

# G24 Base LED PL Lamp

This LED PL lamp directly replaces CFL bulbs and operates on AC120-277V. It is available in 7W, 9W, and 11W power options and fits G24, G24d-1, G24q-1, and G24q-3 sockets.

## ADDITIONAL IMAGES

## Product Overview

### Efficient CFL Replacement

The LED G24 Type A+B PL Lamp serves as a high-efficiency alternative to traditional fluorescent G24 PL tubes. Designed for versatility, it functions as both a rewire and plug-and-play solution, operating effectively with or without a magnetic ballast using an integrated IC driver. With a wide 300° beam angle, this lamp provides comprehensive illumination for a variety of professional lighting applications.
