

G4 LED Bulb Warm White

This LED bulb is designed for efficient and long-lasting illumination. It features a G4 base and emits a warm white light, creating a cozy atmosphere.

Product Overview

High-Efficiency G4 Lighting Solution

This G4 LED bulb features original patented technology designed to deliver high luminous efficiency with minimal lumen depreciation over time. Engineered with an optical PC lamp-house boasting 90% transmittance, it provides uniform, flicker-free 360-degree illumination that is gentle on the eyes. The integrated convection design ensures superior heat dissipation, significantly extending the operational lifespan of the bulb.
