Product Overview

High-Performance G80 Load Chain

This G80 alloy steel load chain is engineered for demanding lifting and rigging applications in industrial and construction environments. Manufactured from high-quality 20Mn2 alloy steel, it offers exceptional durability, wear resistance, and reliable load-bearing performance. Designed for compatibility with electric hoists and heavy lifting equipment, this chain provides a safe and secure solution for your material handling needs.

Technical Specifications

Surface Treatments

Self-color • Polishing • Blackened • Hot-dip galvanized

Material	High quality alloy steel 20Mn2
Quality Grades	G80, G100
