Product Overview

G80 European Safety Hook Claw

The G80 European safety hook claw is a robust and reliable lifting component engineered for demanding industrial environments. Constructed from high-grade alloy steel, it offers exceptional strength and durability for heavy-duty lifting and rigging tasks. Featuring a self-locking safety latch mechanism, this hook ensures secure operations by preventing accidental disengagement during use.

Technical Specifications

Compliance Standards

- EN standards for lifting equipment
- ISO 9001:2008
- OHSAS 18001:2007
- ISO 14001:2004

Material Grade

G80 Alloy Steel

Safety Features

Self-locking mechanism, Safety latch, CE Compliant

Applications

Typical Applications

- Chain slings
- Wire rope slings
- Cranes
- Construction
- Industrial lifting
- Agriculture
