Product Overview

High-Strength G80 Chain Regulator

The G80 chain regulator is a robust and reliable component engineered for demanding lifting and rigging applications. Constructed from high-grade alloy steel, it provides exceptional strength and durability for safe load management in cranes, hoists, and agricultural machinery. Its compact, user-friendly design allows for quick, precise tension adjustments, ensuring optimal chain integrity and preventing slippage during heavy-duty operations.

Technical Specifications

Material Grade	G80 Alloy Steel
Compatible Equipment	Cranes, Hoists, Agricultural Machinery, Construction Machinery

Compliance & Standards

Certified Management Systems

ISO 9001:2008 • OHSAS 18001:2007 • ISO 14001:2004

Certified Operational Scope

- Manufacture of lifting equipment
- Installation of lifting equipment
- Transformation of lifting equipment
- Maintenance of lifting equipment
