

Galvanized Barbed Wire for Fencing

This galvanized barbed wire is designed to create a strong barrier for fencing needs. Its sharp barbs are spaced along the wire strands to provide effective security.

Product Overview

High-Performance Galvanized Barbed Wire

This galvanized barbed wire is designed for robust security and protective isolation in various environments, including pasture boundaries, railways, and highways. Constructed from high-quality hot-dipped or electro-galvanized soft steel wire, it offers excellent durability and resistance to environmental stress. The product features a standard tension strength of 450-500 N/mm², ensuring a reliable barrier for your fencing needs.

Technical Specifications

Tensile Strength

450 N/mm²
Minimum Strength

500 N/mm²
Maximum Strength

Surface Treatments

Hot Dipped Galvanized, Electro Galvanized, PVC Coated

Logistics & Packaging

Standard Coil Weights

- 25 kg/coil
- 50 kg/coil

Packaging Method

Tied by iron wire or per client requirements

Applications

Primary Applications

Pasture Boundary • Railway Fencing • Highway Protection • Protective Isolation
