

Galvanized Dee Shackle with Threaded Pin

This dee shackle is designed for various marine and industrial applications. Constructed from high-strength steel, this shackle provides a secure and reliable connection point for rigging, towing, and lifting operations.

Product Overview

High-Strength Galvanized Dee Shackle

This galvanized dee shackle is engineered for demanding marine and industrial applications, providing a secure connection point for rigging, towing, and lifting operations. Constructed from high-strength steel with a corrosion-resistant finish, it ensures long-lasting durability even in harsh environments. The integrated threaded pin design allows for quick attachment and removal, facilitating efficient workflow on-site.

Technical Specifications

Material & Finish	Galvanized Steel
Closure Mechanism	Threaded Pin
Common Applications	Marine, Rigging, Towing, Lifting, Shipping

Key Features

Product Highlights

- Corrosion-resistant finish for harsh environments
- High-strength steel construction
- Quick-release threaded pin
- Compatible with chains, ropes, and rigging hardware
