Overview

High-Security Perimeter Protection

This Galvanized Double Twisted Barbed Wire is engineered for high-tensile strength and long-lasting performance in demanding environments. Featuring a double-strand twist design and sharp four-point barbs at regular intervals, it provides a robust physical and psychological deterrent for security fencing. The galvanized steel construction ensures superior corrosion resistance, making it an ideal choice for agricultural, industrial, and residential perimeter control.

Technical Specifications

Strength Profile

High-Tensile • Durable • Corrosion Resistant

Material	Galvanized Steel
Construction	Double Twisted Strands

Applications

Recommended Applications

- Agricultural Fencing
- Livestock Containment
- Industrial Security Perimeters
- Residential Property Demarcation
- Security Fencing Enhancements

Compliance & Standards

Industry Standard Tensile Strength, Standard Galvanization
