

Galvanized Hand Pallet Truck for Cold Environments

This hand pallet truck is fully galvanized for use in cold and wet environments. It is equipped with a pressure relief valve and overload valve to prevent pump damage.

Product Overview

Designed for Cold Environments

The Galvanized Hand Pallet Truck is a robust and reliable material handling solution specifically engineered for challenging, cold environments. Constructed from high-strength steel, this equipment ensures efficient movement of palletized goods in demanding conditions like cold storage facilities. It features a hydraulic lift mechanism for smooth, effortless operation and ergonomic controls for operator comfort.

Key Features

Construction Material	High-strength galvanized steel
Ideal Applications	Cold Storage, Warehousing, Distribution Centers, Factories

Performance

Maintenance Level
Low Maintenance • Long-lasting

Lift Mechanism	Hydraulic
Maneuverability	Yes
