

Galvanized Heavy-Duty Chain Swivel

This heavy-duty chain swivel is galvanized for enhanced corrosion resistance. It conforms to Federal Specification RR-C-271D Type VII Class 1, ensuring reliable rotation and load-bearing capabilities.

Product Overview

Heavy-Duty Galvanized Chain Swivel

This heavy-duty chain swivel is specifically engineered for demanding applications that require reliable rotation and robust load-bearing capabilities. Built with a durable galvanized finish, it offers enhanced corrosion resistance, making it an ideal choice for harsh environments. It is designed to effectively connect chains while preventing twisting or kinking under load, ensuring smooth and efficient operation for your lifting, rigging, and securing tasks.

Compliance & Standards

Standards Compliance

Federal Specification RR-C-271D, Type VII, Class 1

Technical Specifications

Primary Applications

- Lifting
- Rigging
- Securing

Finish

Galvanized

Core Function

Prevents twisting or kinking under load
