

Galvanized Hexagonal Wire Mesh (Chicken Wire)

Galvanized hexagonal wire mesh, also known as chicken wire, is a versatile fencing material. It is made from thin, galvanized steel wire woven into a hexagonal mesh.

Product Overview

Versatile Galvanized Hexagonal Mesh

This galvanized hexagonal wire netting, widely known as chicken wire, is a versatile and cost-effective solution for various industrial and residential fencing needs. Manufactured from thin, hot-dipped galvanized steel wire, the mesh features a hexagonal pattern that offers both strength and flexibility, allowing it to conform easily to uneven surfaces. The galvanization process ensures excellent corrosion resistance, significantly extending the lifespan of the netting for both indoor and outdoor applications.

Technical Specifications

Material	Hot-dipped galvanized steel wire
Weave Pattern	Hexagonal

Key Features

Key Benefits	Corrosion Resistant, Flexible, Easy to Cut, Cost-effective
--------------	--

Applications

Typical Applications

- Poultry enclosures
- Garden fencing
- Stucco reinforcement
- Craft projects
