

Galvanized Malleable Iron Hook and Eye Turnbuckle

This turnbuckle is made from malleable iron and galvanized for corrosion resistance. It features a hook on one end and an eye on the other for versatile connection.

Product Overview

Professional Rigging Solution

This commercial-grade malleable turnbuckle is designed for adjusting tension and length in various rigging systems. Constructed from durable malleable iron with a galvanized finish, it offers excellent corrosion resistance for longevity in demanding environments. Featuring a versatile hook and eye configuration, it is an ideal choice for construction, marine, and industrial applications requiring precise tensioning.

Material Specifications

Body Material	Malleable Iron
Hook and Eye Material	C 15

Product Features

Surface Finish	Galvanized
Configuration	Hook and Eye

Applications

Recommended Applications	Construction, Marine, Industrial Rigging
