

# Galvanized Malleable Iron Strain Clamp with U-Bolts

This terminating clamp is made from galvanized malleable iron and utilizes U-bolts. It is designed for secure and reliable termination of electrical conductors in transmission and distribution applications.

## ADDITIONAL IMAGES

## Product Overview

### NLD Series Strain Clamp

The NLD series terminating clamp is a professional-grade strain clamp engineered for the secure termination of electrical conductors. Constructed from high-quality galvanized malleable iron, this clamp offers exceptional durability and superior corrosion resistance for long-term performance in demanding transmission and distribution environments. Featuring a robust design with integrated U-bolts, it ensures a reliable grip and mechanical stability for overhead power line installations.

## Technical Specifications

Heavy-duty strain clamp design featuring U-bolts for secure conductor attachment.

### Finish

Galvanized • Corrosion Resistant

### Material

Galvanized Malleable Iron

### Clamping Mechanism

U-Bolt

### Application

Overhead Power Lines, Transmission Systems, Distribution Systems, Substations

## Certification

### Certifications

CE, ISO 9001
