Product Overview

High-Performance Well Screen

These galvanized stainless steel well screens are engineered for efficient water filtration, sand control, and reliable well development. Featuring a precise 10-slot configuration, they optimize water intake while effectively preventing sediment entry. Built for durability and corrosion resistance, these 6-meter units are suitable for water wells, industrial filtration, and environmental monitoring applications.

Technical Specifications

Slot Size	10 slot
Unit Length	6 m
Diameter Range	25mm - 1000mm
End Connections	Plain beveled ends, Butt welding, Threaded (spiral)

Materials & Construction

Available Materials

- Low carbon steel
- Low carbon galvanized steel (LCG)
- Stainless Steel 304
- Stainless Steel 316

Construction Types

Wire wrapped • Spiral screen tube • Welded wedge wire • Ribbed-type • Pipe base
