Product Overview

Versatile Storage Solution

This galvanized steel shelving unit is a robust and adaptable storage solution designed for professional workshops, garages, and commercial storage environments. Featuring a boltless design, it allows for quick, tool-free assembly, ensuring efficiency during setup. The combination of a corrosion-resistant galvanized frame and durable MDF shelving provides a stable, long-lasting system capable of organizing heavy tools, equipment, and supplies with ease.

Construction & Design

Frame Material	Galvanized Steel
Shelf Material	Medium Density Fiberboard (MDF)
Assembly Method	Boltless (Tool-free)
