Product Overview

Premium Galvanized Steel Coil

This high-quality galvanized steel coil is engineered for superior corrosion resistance and long-term durability in harsh environments. Designed to meet rigorous international standards, it serves as an ideal material for construction, automotive, and manufacturing applications, particularly for roof sheeting. Its consistent mechanical properties ensure excellent performance during forming, stamping, and fabrication processes.

Technical Dimensions

Thickness Range	0.13 mm
Width Range	600 - 1500 mm

Compliance & Quality

Available Grades

SGCC • CGCC • SGCD • SPCC • DX51D • DX52D • DX53D

Standards	AISI, ASTM, BS, DIN, GB, JIS
-----------	------------------------------

Applications

Primary Applications

- Roofing sheets
- Siding
- Automotive parts
- Appliances
- General manufacturing
