Product Overview

Reliable Overhead Line Support

This galvanized steel crossarm is engineered for the secure installation and support of electrical equipment on overhead transmission lines. Constructed from high-quality steel with a protective galvanized finish, it offers superior corrosion resistance and long-term durability in outdoor environments. The design is highly adaptable, with custom sizing available to meet specific project requirements.

Technical Specifications

Country of Origin

China

Material

Galvanized Steel

Dimensions (L x W x H)

2230 x 80 x 8 mm

Primary Application

Overhead Electrical Transmission

Logistics & Packaging

Packaging Configurations

| Batch Type | Quantity | Gross Weight | Net Weight |
|-------------|----------|--------------|------------|
| Large Batch | 57 | 1463 | 1453 |
| Small Batch | 17 | 367 | 357 |

Weight Unit

kg
