

Galvanized Steel Electrical Metallic Tubing (EMT) Conduit

This electrical metallic tubing (EMT) conduit is constructed from high-quality steel with a galvanized coating for corrosion resistance. It is suitable for protecting electrical wiring in both wet and harsh environments.

Overview

Professional Grade EMT Conduit

This Galvanized Steel Electrical Metallic Tubing (EMT) is engineered for high-performance electrical wiring protection. Constructed from high-quality steel with a uniform zinc coating, it offers superior corrosion resistance, making it an ideal choice for mechanical equipment installations in wet or harsh environments. Its lightweight yet durable design facilitates easier handling, cutting, and bending, ensuring efficient installation in commercial and industrial settings.

Physical Properties

Material & Finish	Galvanized Steel, Corrosion Resistant, Uniform Zinc Coating
Color	White

Technical Specifications

Dimensional Specifications

Trade Size (in.)	OD (in.)	Wall Thickness (in.)	Weight (lbs/ft)
1/2	0.706	0.042	0.285
3/4	0.922	0.049	0.435
1	1.163	0.057	0.64
1-1/4	1.51	0.065	0.95
1-1/2	1.74	0.065	1.1
2	2.197	0.065	1.4
2-1/2	2.875	0.072	2.32
3	3.5	0.072	2.8
3-1/2	4	0.083	3.37
4	4.5	0.083	3.78

Standard Length

10 ft
