

Galvanized Steel Exhaust Fan

This robust exhaust fan is designed for efficient ventilation. It features a galvanized steel housing for durability and includes a circular duct connection for easy integration into ventilation systems.

Product Overview

Industrial Ventilation Solution

This robustly constructed electrical exhaust fan is specifically engineered for efficient air extraction and circulation in demanding environments. Featuring a high-quality galvanized steel housing, the unit offers superior durability and resistance against corrosion. Designed for seamless integration, it includes a circular duct connection and an integrated electrical box for simplified wiring and installation.

Construction & Design

Housing Material	Galvanized Steel
Corrosion Resistance	Yes

Installation & Integration

Duct Connection	Circular
Wiring Interface	Integrated electrical box

Applications

Primary Applications	Ventilation, Air Extraction, Air Circulation
