

# Galvanized Steel Hook for Tension Clamps

This galvanized steel hook is used with FHA and PA tension clamps. It is designed for service line applications.

## Product Overview

### Professional Grade Galvanized Hook

This galvanized steel hook is engineered for reliable use in service line applications. Designed to be compatible with FHA and PA tension clamps, it provides a secure mounting solution for electrical infrastructure. The hot-dip galvanized surface ensures durability and resistance against environmental factors, making it suitable for long-term outdoor deployment.

## Technical Specifications

Material & Finish	Steel with hot-dip galvanized surface
Compatible Accessories	FHA tension clamps, PA tension clamps

## Dimensions & Performance

Type	Dimensions(mm)			Failure Load(kN)		Pack (pcs)
	L	W	A	Fx	Fy	
GM-12	100	109	15	4.5	2.1	20

Dimensional and load capacity specifications for the GM-12 model.

### Dimensional Data

Dimension	Value	Unit
Length (L)	100	mm
Width (W)	109	mm
Thickness (A)	15	mm

### Failure Load Capacity

**4.5 kN**

Fx Direction

**2.1 kN**

Fy Direction

## Logistics

Units per Pack	20 pcs
