

Galvanized Steel Pipe Fittings for HVAC&R Piping

These galvanized steel pipe fittings are designed for HVAC&R piping systems. They provide a durable, corrosion-resistant method for joining pipe sections in diverse configurations for fluid and gas transfer.

Product Overview

Professional HVAC&R Piping Solutions

These galvanized steel pipe fittings are engineered to provide robust, corrosion-resistant connections for HVAC and refrigeration piping systems. The range includes sockets manufactured from seamless steel pipes and nipples crafted from high-quality ERW pipes. Designed for versatility and durability, these components ensure reliable fluid and gas transfer in demanding industrial environments.

Technical Standards

Certified Standards	BS1387, ASTM A733, DIN2982, JIS B2302
