Product Overview

Professional Grade Galvanized Roofing Nails

These high-quality galvanized steel roofing nails are engineered for secure and durable fastening of wood components, asbestos, and plastic tiles. Featuring a robust design with excellent corrosion resistance, they are ideal for demanding outdoor roofing applications. Available in multiple shank and length configurations to meet specific construction requirements.

Technical Specifications

Surface Finishing

Galvanized • Polishing

Material Options

Carbon Steel, High-strength Carbon Steel, Low Carbon Steel

Shank Design

Plain Shank, Twisted Shank, Screw Shank

Point Type

Diamond point

Place of Origin

Gaomi City, China

Minimum Order Quantity

1 ton
