

Galvanized Steel Roofing Panel Roll Forming Machine

This high-quality galvanized steel roofing panel roll forming machine is designed for efficient and precise roll forming. It ensures consistent quality and durability, making it suitable for various roofing applications.

Product Overview

High-Efficiency Roofing Panel Production

This galvanized steel roofing panel roll forming machine is engineered for precision and durability in industrial roofing applications. Featuring a robust construction and advanced PLC touch-screen control system, it ensures consistent output quality for steel construction projects. With a production speed of 10 meters per minute and a monthly capacity of 30 sets, this equipment provides a reliable solution for high-volume manufacturing needs.

Technical Specifications

Power Rating	5.5 kw
Operating Voltage	380V
Making Speed	10 m/min
Machine Dimensions	8.5M x 0.8M x 2.3M

Operational Details

Monthly Capacity	30 sets/month
Control System	PLC (Touch Screen)
Primary Usage	Roof Production, Steel Construction, Tile Forming

Compliance & Support

Certifications	ISO 9001
Warranty Period	1 Year
Service Support	Engineers available for overseas service
