

Galvanized Steel Support Bracket for Rectangular Bars

This support bracket is expertly welded and made from high-quality materials. Its simple, reliable structure ensures prompt delivery and stable support for rectangular profiles.

Product Overview

Reliable Support for Rectangular Profiles

This galvanized steel support bracket is engineered for the secure mounting of rectangular bars in outdoor environments. Combining an aluminum alloy upper cover with hot-dip galvanized steel components, the bracket offers exceptional resistance to corrosion and long-term durability. Its robust design features multiple mounting holes, providing the versatility needed for various industrial and structural installation requirements.

Material & Construction

Material Composition

Component	Material
Upper Cover	Aluminum Alloy
Base/Structural Parts	Hot-DIP Galvanized Steel

Corrosion Resistance

Hot-DIP Galvanized • Outdoor Rated

Installation

Application	Rectangular Bar Support, Outdoor Mounting, Structural Support
