

Galvanized Steel U-Bolt Pipe Clamp

This galvanized steel U-bolt pipe clamp is designed for securing pipes or tubes. It features a U-shaped bolt with a flat base on each end for mounting.

Product Overview

Professional Grade Pipe Securing Solution

This galvanized steel U-bolt pipe clamp is engineered for reliable, heavy-duty pipe and tube support. Featuring a robust U-shaped design with reinforced mounting bases, it ensures stability in demanding plumbing, electrical, and mechanical environments. The galvanized finish provides excellent corrosion resistance, making it an ideal choice for both indoor and outdoor industrial installations.

Technical Specifications

Surface Treatment

Galvanized • Corrosion Resistant

Material

Galvanized Steel

Mounting Type

Bolt-down base

Applications

Suitable Applications

- Plumbing systems
- Electrical conduit support
- Mechanical piping
- Structural tube securing
