

Galvanized Steel Wire Rope Thimble BS464

This heavy-duty thimble protects wire rope eyes from wear and deformation. It is constructed from high-strength steel and is hot-dip galvanized for corrosion resistance.

Product Overview

Heavy-Duty Protection for Wire Rope

This galvanized steel wire rope thimble is engineered to BS464 standards, providing essential protection for wire rope eyes against wear, abrasion, and deformation. Constructed from high-strength steel and finished with a hot-dip galvanized coating, it offers superior corrosion resistance for long-term durability. It serves as a secure and reliable termination point, making it an ideal component for rigging, lifting operations, and demanding marine environments.

Technical Specifications

Standard Compliance

BS464

Primary Applications

- Rigging systems
- Lifting operations
- Marine environments

Key Benefits

1 High

Corrosion Resistance

1 Maximized

Wear Protection

Material & Finish

High-strength steel, Hot-dip galvanized
