

# Garbage Bin Injection Mould

This precision-engineered mould is designed for the efficient production of garbage bins. It features robust construction with core and cavity sections, ejector pins, and advanced cooling channels.

## Product Overview

### Precision-Engineered Injection Mould

This precision-engineered mould is specifically designed for the efficient, high-volume production of daily-use garbage bins. It features a robust construction comprising core and cavity sections to ensure accurate and consistent bin dimensions across every cycle. Equipped with advanced cooling channels and reliable ejector pins, this mould is optimized for durability and reduced cycle times in professional manufacturing environments.

## Technical Features

### Suitability

High-Volume Production • Plastic Injection Moulding

### Components

Core Section, Cavity Section, Ejector Pins, Cooling Channels

## Performance Metrics

### Cycle Efficiency
