

# Garbage Bin Injection Mould

Mould for producing daily use garbage bins. This mould is designed for efficient and precise manufacturing of plastic garbage bins, ensuring consistent quality and durability.

## Overview

### High-Efficiency Injection Moulding Solution

This injection mould is engineered specifically for the precise and efficient production of daily-use garbage bins. Designed to withstand the rigors of mass production, it ensures consistent product quality and structural durability for every unit manufactured. It serves as a critical component for production lines focused on household and industrial waste management solutions.

## Technical Details

### Available Model Variants

- Dust Bin mould\_293
- Dust Bin mould\_291
- Dust Bin mould\_290
- Dust Bin mould\_289
- Dust Bin mould\_288
- Dust Bin mould\_287

### Production Focus

High-Volume Manufacturing • Mass Production

### Primary Application

Household Waste Management, Industrial Waste Management, Plastic Injection Moulding
