

Garden Fork with D-Grip Handle

This garden fork is designed for turning soil, aerating, and handling materials. Constructed from high-strength steel, it features four durable tines and an ergonomic D-grip handle for comfortable use.

Product Overview

Professional Grade Garden Fork

The F107MD Fork is a robust gardening tool designed for efficient soil turning, aerating, and material handling. Constructed from high-strength, completely forged steel, this tool features four durable tines engineered to penetrate various soil types with ease. The ergonomic D-grip handle provides a comfortable and secure hold, reducing strain during extended use, while the black powder-coated finish offers superior corrosion resistance.
