

Garden Jet Pump for Water Transfer and Irrigation

This garden jet pump is designed for efficient water transfer and irrigation. Its jet pump design allows it to draw water from shallow wells or tanks, making it versatile for different water sources.

Product Overview

High-Performance Garden Jet Pump

The SGJC SGJ Garden Jet Pump is a versatile and robust solution designed for efficient water transfer and garden irrigation. Engineered with a durable stainless steel pump body and a high-performance motor, this unit ensures reliable operation for various water supply needs. Its advanced jet pump design effectively draws water from shallow wells or tanks, making it an ideal choice for pressure boosting and agricultural or residential irrigation systems.

Construction & Materials

Pump Body Material	Stainless steel
--------------------	-----------------

Key Features

Design Type

Jet Pump Design • Robust Construction

Application Areas	Garden Irrigation, Water Transfer, Pressure Boosting, Shallow Well Pumping
