

Garden Saw Blade for Vegetation Cutting

This circular saw blade is designed for garden use, featuring multiple teeth for efficient cutting. The blade has a series of holes for weight reduction and cooling, making it suitable for cutting through various types of vegetation.

Product Overview

Professional Garden Saw Blade

This circular saw blade is specifically engineered for efficient vegetation management and garden maintenance. Designed for durability and performance, it features a specialized tooth configuration for clean, effective cutting. The integrated cooling holes help manage heat during operation, ensuring consistent results across various garden tasks.

Technical Specifications

Applications

- Vegetation cutting
- Garden maintenance
- General landscaping

Blade Type	Circular Saw Blade
Design Features	Weight Reduction Holes, Cooling Vents, Multi-Tooth Design
