

Garden Water Pump with Stainless Steel Housing

This garden water pump is designed for efficient water transfer in garden and domestic applications. Its stainless steel housing provides durability and resistance to corrosion, making it suitable for pumping clean water from various sources.

Product Overview

Robust Garden Water Solution

The GP Inox-1J garden pump is a durable and efficient solution designed for various garden and domestic water supply applications. Featuring a high-quality stainless steel pump housing, it offers excellent corrosion resistance and longevity. Its powerful motor ensures reliable performance for tasks such as irrigation, pressure boosting, and general water transfer from wells or tanks.

Technical Specifications

Housing Material	Stainless Steel
Ideal Applications	Irrigation, Pressure Boosting, Water Transfer, Domestic Supply
Suitable Water Type	Clean water

Design Features

Key Design Features

- Corrosion-resistant stainless steel housing
- Compact and portable design
- Easy installation
- Powerful motor for efficient transfer
