

Garden Water Pump with Stainless Steel Tank

This garden pump is designed to provide a reliable and efficient water supply for various outdoor applications. It features a durable stainless steel tank and a powerful motor for consistent performance.

Overview

Reliable Garden Water Solution

This garden jet pump is engineered to provide a consistent and efficient water supply for various outdoor tasks. Featuring a durable stainless steel pump head and a robust stainless steel tank, it is built for long-term reliability in clean water applications. With a versatile power range from 600W to 1200W, it is an ideal choice for irrigation, boosting water pressure, and general water transfer in gardens and landscapes.

Performance

Power Output

600 W

Minimum Power

1200 W

Maximum Power

Construction & Materials

Material Composition

Stainless Steel Pump Head, Stainless Steel Tank

Application

Usage Type

Clean Water Only

Suitable Applications

- Garden Irrigation
- Water Pressure Boosting
- General Water Transfer

Features

Key Features

- Automatic operation via pressure switch
- Flexible hose for easy connection
