

Garden Water Transfer Pump

The GP-CP garden pump is designed for efficient water transfer in gardens and outdoor spaces. This robust pump features a durable construction for long-lasting performance.

Product Overview

Efficient Water Transfer Solution

The GP-CP garden pump is engineered for efficient water transfer in gardens and outdoor spaces. Featuring a robust and durable construction, this unit is built for long-lasting performance and reliability. It is ideal for irrigation, water extraction from wells or tanks, and various general-purpose water pumping applications, offering a user-friendly solution for effective garden water management.

Technical Capabilities

Design Highlights

- Durable construction
- Ease of use
- Low maintenance requirements

Primary Applications

Irrigation, Well Water Extraction, Tank Water Transfer, General Pumping
