

Gardening Pickaxe with Hoe End

This pickaxe is a robust gardening tool designed for digging, chopping, and breaking up hard soil. It features a durable metal head with a pointed pick end and a broad hoe end for moving soil.

Product Overview

Professional Gardening Pickaxe

The P406B gardening tool is a robust implement designed for heavy-duty digging, chopping, and breaking up hard soil. Featuring a dual-purpose head, it combines a pointed pick end for penetrating tough ground with a broad hoe end for efficient soil displacement. This tool is engineered for durability and reliability in demanding landscaping and gardening environments.
