

Garment and Shoe Sewing Machine

This sewing machine is designed for garment, shoe, and accessory manufacturing. It features a comprehensive selection of stitch patterns easily selectable via a rotary dial.

Overview

Professional Versatility

This robust sewing machine is engineered specifically for the demanding requirements of garment, shoe, and accessory manufacturing. Designed with a focus on durability, its sturdy construction supports continuous, high-volume operation in professional environments. Users benefit from a comprehensive selection of stitch patterns, easily managed via a tactile rotary dial, and a well-lit work area that ensures precision and visibility for intricate tasks.
