

Garment and Shoe Sewing Machine

This sewing machine is designed for garment, shoe, and accessory manufacturing. It features a standard needle and presser foot configuration.

Overview

Versatile Industrial Sewing Solution

This professional-grade sewing machine is engineered specifically for the rigorous demands of garment, shoe, and accessory manufacturing. Designed with a robust, user-friendly interface, it offers precise control over stitch selection and tension to ensure high-quality output for various textile applications. Its reliable performance makes it an essential tool for apparel production lines seeking consistent results.

Technical Specifications

Machine Configuration

- Standard needle configuration
- Adjustable presser foot
- Integrated tension adjustment controls
- Stitch selection interface

Suitable Applications

Garment Manufacturing, Shoe Production, Accessory Assembly, Apparel Textile

Design

Body Material

White plastic housing
